PRE-CONSTRUCTION COMPLIANCE

_____ agrees to provide the required services for the above listed project. The services provided will be in accordance with the International Building Code for Commercial construction and the International Residential Code for Residential construction and accepted engineering practices. There will be a pre-footing/ foundation compliance report submitted to the City Building Division and a final backfill/ grading compliance report will be submitted to the City Building Division before final inspection. These reports will be stamped by the engineer of record with their professional opinion as to the work meeting compliance with the proper codes and engineering standards and the geotechnical report.
